### **Reasons For Allowance**

1. The amendment filed 5/26/05 has been entered.
2. The following is an examiner's statement of reasons for allowance: The Decision of the board of Appeals reversed the original grounds for rejection, but formed a new grounds of rejection based also on Dazey and on Endres. The amendment filed 5/26/05 overcomes the art by adding to both independent claims the specific features of intercepting the noncontext sensitive user request for auxiliary information and determining an active window displaying an application program output from among one or more open windows, and making the user request context sensitive and associating the auxiliary information with the application program based on that determination. This in combination with the other features elucidates how the invention then dedicates the application program output to one display area and dedicates the auxiliary information related to the application program output (and not the program itself) to a predetermined second display area, and such that the auxiliary display never overlaps or conceals the application program output. The features combined in independent claims 1 amended (system) and 12 amended (method) are not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
